Take Your Own New Age Piano Journey!

Dear friends... You've heard it many times before. Perhaps while you were out shopping or at a friends house. The beautiful music that has become known as New Age piano was first popularized by pianist/composer George Winston in the early 1980's.

Light and heartfelt, the melodies and chords of this style are EASY to create! It's an attractive way for the beginning and more advanced piano player to get started in music making! Let's examine how a complete beginner can create a lovely melody using a few chords.

First, we must learn how to play chords on the piano. Note reading won't do here because we're trying to create something original - something that requires the ability to improvise. Now don't get scared! Improvisation is easier than you think and you can create **beautiful music with just a few chords.**

For example, in the lesson "**Nurturing Rain**," available here, (<http://youtu.be/RaI0GVJF2cM>) you use just two chords to create a calm, reflective atmosphere. The trick is how the chords are used!

Both hands are called into play as we create a modern contemporary sound - the kind of sound that is used in much New Age piano music created today!

We learn how to play just a few chords in this lesson, but a few chords are all we need to create improvised New Age piano music. Once you have this large chord structure under your fingers, beautiful music is created; not by forcing or willing the creative act, but by letting it all go and **allowing it to happen!**

Warmest wishes,
Edward Weiss
