## Take Your Own New Age Piano Journey!

Dear friends... You've heard it many times before. Perhaps while you were out shopping or at a friends house. The beautiful music that has become known as New Age piano was first popularized by pianist/composer George Winston in the early 1980's.

**Light and heartfelt, the melodies and chords of this style are EASY to create!** It's an attractive way for the beginning and more advanced piano player to get started in music making! Let's examine how a complete beginner can create a lovely melody using a few chords.

First, we must learn how to play chords on the piano. Note reading won't do here because we're trying to create something original - something that requires the ability to improvise. Now don't get scared! Improvisation is easier than you think and you can create **beautiful music with just a few chords.**

For example, in the lesson "**Forest Interlude**," available here, ([http://youtu.be/ORHBod\\_YWdk](http://youtu.be/ORHBod_YWdk)) you use just a few chords to create a calm, reflective atmosphere. The trick is how the chords are used!

Both hands are called into play as we create a modern contemporary sound - the kind of sound that is used in much New Age piano music created today!

We learn how to play just a few chords in this lesson, but a few chords are all we need to create improvised New Age piano music. Once you have this large chord structure under your fingers, beautiful music is created; not by forcing or willing the creative act, but by letting it all go and **allowing it to happen!**

Warmest wishes,
